

LLC "SOKOLOVSKIY-FORTUNA"

"Nature" Series

"Dr. Sokolovskiy" Formula

Personal and collective protection devices
against electromagnetic radiation
and harmonization of space

Problem: Electromagnetic smog and energy-informational damage

The modern environment is saturated with man-made and natural sources of electromagnetic radiation (hereinafter referred to as EMR):

- Mobile devices, telecommunications infrastructure
- Household and industrial appliances
- Geopathic zones, the influence of space and earth

These factors cause an effect known as "electromagnetic smog," which can disrupt human homeostasis and cause health problems.

Solution: Transform the damage in favor

Our “Nature” Series products are not just about protection. They convert harmful EMR signals into harmonic ones according to the principle of inversion of influence.

Main products:

- **Nature Shield** – for individual use
- **Nature Spread** – for collective protection against EMR and harmonization of space

Nature Shield

Nature Spread

How does it work?

Each device contains biopolymer plates with a layer of phytolysates of over 30 biologically active plants and minerals by *formula "Dr. Sokolovskiy"*, which create an energy field, which harmonizes the frequencies of your body and protects against the negative effects of EMR

The technology is based on a combination of several interdisciplinary approaches:

*Physical Vacuum Theory
and the Single Field*
(Akimov & Shipov, 1996)

*Principle of coherence
in biosystems*
(Hameroff & Penrose, 2014)

*Synergetic effects of
complex phytosystems*
(Haken, 1983)

*Stochastic resonance in bioinformatic
interaction*
(Gammaitoni et al., 1998)

Physical Vacuum Theory and the Single Field

The essence of Concepts:

Physical vacuum is not a "void", but the lowest energy state of space, which has quantum fluctuations and its own energy structure. According to theories (Akimov and Shipov, 1990s), vacuum has torsion fields that arise from the rotation of elementary particles or macroobjects.

In the context of the "Nature" Series devices:

Each bioobject polarizes the vacuum and creates a field structure around itself. Interaction with the field by **devices** can change this structure — harmonize it or invert the negative energy-informational effect.

Principle of coherence in biosystems

The essence of Concepts:

Coherence is the ability of wave systems to operate synchronously — in harmony in phase, frequency, and amplitude. In quantum biology, it is assumed that biological systems can maintain coherent states even at room temperature (Penrose & Hameroff, 1996, Orch-OR theory).

In the context of the "Nature" Series devices:

Coherent field created by **devices**, brings the body into phase coherence, i.e. synchronizes physiological processes and influences the effective restoration of homeostasis.

Synergetic effects of complex phytosystems

The essence of Concepts:

Synergetics is the science of self-organization of complex systems. It studies how ordered structures can emerge from chaos — the principle of "emergence": a system acquires properties that its components do not possess individually (Haken, 1983).

In the context of the "Nature" Series products:

Phytolysates from over 30 plants and minerals form system-forming bonds. It is this interaction that gives a harmonizing effect — not only due to the individual components, but also their joint behavior. This is a true example of a natural emergent system.

Stochastic resonance in bioinformatic interaction

The essence of Concepts:

This is a phenomenon where the presence of noise or weak fluctuations in a system enhances the perception of a weak signal. In biology, this can manifest as an enhanced response of neurons or cells to an external signal at a certain level of "chaos".

In the context of the "Nature" Series products:

Background EM-radiation (in particular, mobile phone noise waves) can amplify the effects of weak but precise energy-informational signals by **devices**, thereby effectively resonating with the body's regulatory system.

Areas of use:

Nature Shield

- Smartphones, tablets, laptops
- Household appliances (near Wi-Fi, TV)
- Office jobs
- Personal transport
- For children, pregnant women, elderly people

Nature Spread

- *Offices, conference rooms, coworking spaces*
- *Home rooms*
- *Industrial facilities / laboratories*
- *Transport (car, metro, electric locomotives)*
- *Greenhouses, agriculture*

Main characteristics and methods of use:

Nature Shield

- 30+ phytomineral components
- Reusable, long-term (up to 24 months) use
- Maintenance-free
- Attach to smartphone, laptop or wear next to body

Nature Spread

- 30+ *phytomineral components*
- *Reusable, long-term (up to 24 months) use*
- *Spatial coverage – up to 10 m²*
- *Place in the center of the room / space*
- *Can be attached to appliances or furniture*

LLC "SOKOLOVSKIY-FORTUNA"

*Energy-informational influence
is not a fantasy, but a reality of our time.
But now you have technology that works for
you, not against you.*

Thank you for your attention!
